- Github [Codespaces](#)
 - Developing online with Codespaces
 - “You can develop entirely in the cloud using Codespaces, an integrated development environment (IDE) on GitHub.”
 - [Discussion](#)
 - + “Wow! Will definitely try this out. I currently manually do my website design and content through HTML/CSS on a Github Repo through the online editor, that is set up as Github Pages.”
 - “The slow erosion of control. All your data is on the cloud. Developers coding online. No right to repair the devices you purchase. It's a disaster unfolding in slow motion.”

- 23.09.2020: [DeFi projects rush towards Layer 2 as Ethereum clogs up](#)
 - Synthetix – two upgrades to reduce gas
 - Uniswap V3 – L2 may be included
 - L2 - “off-chain” scaling solutions
- [Gas price](#)

Git Tutorial / Game

- <https://learngitbranching.js.org/>
- “LearnGitBranching is a git repository visualizer, sandbox, and a series of educational tutorials and challenges. Its primary purpose is to help developers understand git through the power of visualization (something that's absent when working on the command line). This is achieved through a game with different levels to get acquainted with the different git commands.”
