Distributed Systems & Blockchain in the News

- 17.12.2024: Winner of the HS 2024 Blockchain Challenge Task [\[link\]](#)
 - Design and implementation of a stablecoin with rebalancing on decentralized exchange
 - Winner: WTIST Stablecoin, Group 7 – Tom, Micha, Nico
 - Stablecoin tied to the price of Western Texas Intermediate (WTI) crude oil using Arbitrum and Uniswap on a DEX
 - Many good submissions, key factor: using Arbitrum
 - Dev experience of non-Ethereum based is bad, extra effort needed, even going to a L2 makes the dev experience worse. Also impressed, Flipcoin, group 13 with Sui.
- 12.12.2024: Clober Dex Incident Analysis [\[link\]](#)
 - Reentrancy vulnerability in the `_burn()` function
 - Loss of 133.7 ETH
- 12.12.2024: DeFi rug pull surge reveals more complex crypto scam strategies [\[link\]](#)
 - Rugpull incidents: 31 incidents on [14.11.2024](#)
